

### High Speed Automatic Patti Calendar Machine

This unique machine automatically applies the tin patti on the 1 to 13 page calendars with absolute ease. Load the patti in form of a cartridge and run the machine . With production speed up to 2000 calendars per hour, this can produce up to 10 lac calendars per month with long run. Which means you could easily do 30 to 50 lacs calendars in a season.

Product Specifications	
Type Specification	NB600DT... 600 mm width option for 800 mm available
Clamped Hanger Installation Speed	40-50 sheets per minutes.
Size	Max (600 x 900)/Min (254 x 250)
PowerRequirements	0.75kW/200W/90W
Total Weight	620kg

#### Patti Specifications :

Size	: 87 to 730mm Ready-made size 190mm, 254mm, 297mm, 380mm, 420mm, 515mm, etc.
Type	: No hole. one hole. (Standard) Two holes. Three holes
Correspondence	: 7 pages at ones. 13 pages at ones etc.
Color	: Gray, red, black, white, blue, green, yellow, red, gold, silver

#### Operations

- Place a cartridge of patti in the chute at the back of the machine.
- Place calendars on the front belt conveyer. The system installs automatically clamped hangers patti in three folded shape and ejects from the back.
- The most advantage is that this machine requires neither gluing back of calendars nor peeling (dividing) which is the biggest burden to make calendars. Clamped hangers can be installed to unglued sheets.
- For the speed, it is possible to bind 17,000 - 20,000 of calendars if it is run for 8 hours per day.
- Equipped with a device to check malfunction of taking out clamped hangers and defection of clamped hanger installation.
- No compressed air or vacuum required.
- Clamped hanger feed can be easily adjusted since it is automatic feed.
- Capable of binding any of 1, 7, or 13-sheet of calendars (posters).
